

WHAT IS CLAIMED IS:

1. A speaker device comprising:

a magnetic circuit including a magnet and a yoke;

5 a voice coil which is placed in a magnetic gap of said magnetic circuit;

a diaphragm which is vibrating available in a state where said diaphragm is coupled with said voice coil; and

a damper which is placed between a portion of said diaphragm on a side of said voice coil and a housing,

10 wherein said speaker device has a damper holder which is disposed on said housing, and to which said damper is connected, and said housing and said damper holder are in contact with each other via projections which are disposed on one of said housing and said damper holder.

15 2. A speaker device according to claim 1, wherein said projections are three or more in number.

3. A speaker device according to claim 1, wherein said damper holder is made of a hybrid material of a resin and tungsten.

20 4. A speaker device according to claim 3, wherein said resin is polypropylene.

5. A speaker device according to claim 3, wherein said damper holder has a specific gravity of 10.0 or larger.
